

COHORT'S MANAGED SECURITY SERVICE

Do you want to provide a managed security service to your customers but don't have the resources, time or staff to manage this efficiently?

Cohort's managed security service gives you a hassle free way to manage your customer's security and enter the services business without the financial means or desire to manage security in-house.

In conjunction with the Stonesoft MSSP Solution, Cohort gives you the flexibility to select and control what additional service modules you want to deliver in order to become a Managed Service Provider. See reverse for full details

BENEFITS OF IMPLEMENTING COHORT'S MANAGED SECURITY SERVICE

Cohort's managed security service, powered by Stonesoft, enables you to:

- **Expand your business without any initial setup costs**
- **Increase your revenue and added value**
- **Decide and control what service modules you want to deliver**
- **Pay per device**
- **Provide enterprise grade security**

ABOUT COHORT TECHNOLOGY

Cohort Technology is an evolution of the traditional value-add distribution model. Cohort combine representing new and emerging products and technology in the UK and European market with meeting the need to offer value-add services to both vendors and partners.

SUMMARY OF SERVICE BENEFITS*

COST EFFECTIVE SOLUTION

Our security service delivers a cost-effective global security management solution that reduces staffing requirements, speeds up deployment and dramatically lowers the cost of managing security services. All delivered in partner branding.

24/7/365 MONITORING

Cohort has the resources to react quickly to security problems as they arise, any time, day or night.

COMPREHENSIVE CHOICE OF OPTIONS

From Virtual to Hardware firewall platforms, Cohort offers a tremendous range of value and performance options from small to medium to large deployments.

EASE OF IMPLEMENTATION

Cohort takes care of the complete solution, including hardware, installation, configuration, and ongoing management.

ON-DEMAND REPORTS

Our service can generate a wide range of informative and historical reports to provide insight into the usage trends and security events of your managed appliance.

*Dependant on service level
